

R17: Live Traffic NSW Web App - Master Test Execution

This master execution run tracks the complete end-to-end testing lifecycle for the Live Traffic NSW web platform, covering Trip Planning, Interactive Map UI, Hazard Systems, and Performance metrics

Created On	8/25/2026
Completed	No

Passed	Blocked	Untested	Skipped	Failed
50% (15/30)	0% (0/30)	0% (0/30)	0% (0/30)	50% (15/30)
Automation Passed	Automation Failed	Automation Error		
0% (0/30)	0% (0/30)	0% (0/30)		

Test Cases

Interactive Map Layers 7

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T174	Verify real-time incident pin layout interactivity			Failed		
T177	Verify Live Traffic Camera Tooltip and Image Rendering			Failed		
T186	Verify Live Traffic Camera Video Streaming Switch			Failed		
T187	Verify interface calculation button presence when handling text script payloads			Failed		
T193	Verify live traffic camera video stream windows load and play upon user selection			Passed		
T194	Verify responsiveness of layout rendering			Passed		

when switching
between Map
and Satellite
view toggle
modes

T195	Verify map zoom controls respond accurately via both UI buttons and mouse scroll wheel actions	Passed
------	--	--------

Search & Filtering Infrastructure 8

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T175	Validate location search autocomplete and viewport snapping			Passed		
T178	Validate Region Search Autocomplete and Coordinate Snapping			Passed		
T181	Verify Empty Search Input and Special Characters Handling			Failed		
T188	Verify destination selection fields handle input boundary validation for raw punctuation and special characters			Failed		
T189	Validate system response when a mandatory route planning input field is left empty			Failed		
T190	Verify map route updates			Passed		

dynamically
after
swapping
origin and
destination
points

T191	Verify search input fields reject raw emoji symbols and completely invalid character strings	Failed
T192	Verify search input fields enforce maximum character limits and prevent text buffer overflows	Failed

Route Planner Engine

5

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T176	Verify route planning calculation and alert boundary matrix			Passed		
T179	Verify Route Calculation Matrix and Multi- Option Displays			Passed		
T180	Verify "My Alerts" Local Caching of Favorite Routes			Failed		
T182	Validate Route Planner with Identical Origin and Destination			Failed		
T183	Validate Route Planner			Failed		

against
Impossible
Overland
Journeys

Security & Environment Edge Cases 2

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T184	Verify Cache Control and Session Security Post-Logout			Failed		
T185	Verify Map Feed Graceful Degradation on Network Dropout			Passed		

Hazard Notifications & Incidents 5

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T196	Verify active hazard warning icons populate the sidebar list panel correctly			Passed		
T197	Check that clicking a sidebar hazard warning focuses the main map directly on the incident coordinates			Passed		
T198	Validate that upcoming planned major road closures display correct dates, timelines, and detour routes			Passed		
T199	Validate that critical weather and environmental			Passed		

emergency
alerts display
high-priority
styling flags

T200	Verify the Share Incident button feature copies functional hyperlinks cleanly to the clipboard	Failed
------	--	--------

Browser & Mobile Performance 3

ID	Title	Test Labels	Assigned To	Status	AI Priority	AI Reason
T201	Verify layout responsiveness and tile rendering across major desktop web browsers			Passed		
T202	Verify user interface responsiveness and breakpoint transformations across mobile viewports			Failed		
T203	Verify data preservation durability and fallback error notifications during network drops			Passed
